INDEX

A

- ABO and AB1 PCA Commands, 5-2
- AC Power
 - fail signal, 12-9
 - to blower/floppy disk system, 12-78
- Access Code, 10-46, 13-250,
- Account Code Commands
 - clear tables, 13-221
 - list report, 13-219
- ACD. See Automatic Call Distribution.
- AC1/AC2 Missing at A3TB2 of Common Control Motherboard, 12-76
- Address Bus Command Word Configuration, 5-10
- Address Plug
 - expander PCA, 5-15
 - model 85320 48k memory PCA, 4-20
 - model 85320A 48k memory PCA, 4-20
 - model 85320B 48k memory PCA, 4-21
 - 12k memory PCA, 4-19
- Adjustments, Voltage
 - memory power supply, 12-9
 - 208-Vac main power supply, 12-7
- AFACTS, 1-46
- Agent Performance and Status Report, 13-179, 13-190
- Agent Statistics Report, 13-196, 13-197
- AIOD Commands
 - AIOD test, 13-75
 - begin AIOD test, 13-75
 - list AIOD dynamic table, 13-75
 - list AIOD translation table, 13-76
 - list AIOD trunk display group default extension, 13-75
 - list console AIOD extension I.D. numbers, 13-76a
 - list trunk to AIOD I.D. number, 13-77
 - revise AIOD translation table, 13-76
 - revise AIOD trunk display group default number, 13-75
 - revise console AIOD extension I.D. number, 13-77
 - revise trunk to AIOD I.D. number, 13-77
- Air Conditioning, 2-42a
- cabinet 1 with nonredundant CPU, 144k memory, and redundant power, 2-46
- dc cabinet 1 with nonredundant CPU, 144k memory, and nonredundant power, 2-47
- dc cabinet 1 with redundant CPU, 144k memory, and nonredundant power, 2-48
- dc cabinet 1 with redundant CPU, 144k memory, and redundant power, 2-48
- dc cabinet 2 and 3 with nonredundant power, 2-48
- dc cabinet 2 and 3 with redundant power, 2-49
- environmental requirements
 - ATC, 2-43
 - cabinets, 2-43
 - floppy disk drives, 2-49
 - 208-Vac cabinet 1 with nonredundant CPU and 144k memory, 2-45
 - 208-Vac cabinet 1 with redundant CPU and 144k memory, 2-45
 - 208-Vac cabinets 2 and 3, 2-46
- Alarm
 - high temperature, 2-10, 12-48
 - software, 12-50, 12-53
- Alignment, ATC, 9-13, 9-15
- Amplifier, Paging, Troubleshooting, 10-64
- Analog PCA, 16-Channel ETI II. See ETI II Analog PCA.
- Answer Supervision (Tie Trunk)
 - dial tone, 10-61
 - off hook, 10-61
- APL. See Automatic Program Load.
- Area Autoselect
 - list area autoselect table, 13-78
 - set area autoselect, 13-85
 - tables, 11-19
- Area Code Commands
 - delete area code, 13-89
 - list area codes, 13-98
 - new area code, 13-88
 - revise area codes, 13-89
- Area Code Only Table, 11-23
- Area Routeselect
 - list area routeselect, 13-86
 - set area routeselect, 13-86
 - table, 11-22, 13-253
- ATC. See Attendant's Console.
- Attendant's Console
 - ACTST, 2-298a
 - attaching cradle, 2-54

check, 2-280
 commands
 associate trunk with console, 13-57
 list ATC group, 13-47
 list console AIOD extension number, 13-76
 revise ATC extension, 13-48a
 revise ATC group, 13-48
 revise console AIOD extension number, 13-76
 controls and indicators, 2-224i
 cross-connects, 2-90
 functional description, 9-1
 block diagram, 9-3
 signal flow, 9-2
 general description, 1-25, 1-26
 group table, 13-254
 installation, 2-92, 2-119
 cable terminations, 2-120
 StarSet, 2-121
 VENTURE 1, 2-121
 maintenance
 removal and replacement, 9-4
 troubleshooting, 9-4
 system configuration printout A and B, 2-92
 unpacking and inspection procedures, 2-53
 Audit Table

 CBX Documents, 1-2

CBX Management Reporter, 1-44

commands, 13-204

- add department to exceptional call recording list, 13-227
- assign department name, 13-214
- change telephones not subject to call accumulation, 13-217
- change telephones subject to call accumulation, 13-217
- clear account code tables, 13-221
- delete department, 13-214
- delete division, 13-212
- delete holiday, 13-210
- designate holidays, 13-210
- exchange extensions subject to CMR, 13-219
- list account code report, 13-219
- list all holidays, 13-209
- list calls to specific numbers, 13-224
- list CDR block count, 13-228
- list CMR status of extension number, 13-229
- list CMR traffic configuration, 13-200
- list CMR traffic statistics report, 13-198
- list corporate summary, 13-221
- list cost printout adjustment factor, 13-218
- list department name, 13-213
- list departments subject to exceptional call recording, 13-226
- list division summary, 13-222
- list exceptional call parameters, 13-225
- list exceptional calls, 13-225
- list extension call details, 13-218
- list extensions not in summary report, 13-223
- list extensions within departments, 13-214
- list flat rate table, 13-210
- list international rate, 13-211
- list maximum NNX count, 13-205
- list maximum rate group count, 13-208
- list NNX table count, 13-205
- list NNX table, 13-204
- list NPA table, 13-206
- list rate group count, 13-209
- list rate group, 13-207
- list remaining CDR capacity, 13-228

- list summary reports for all extensions within department, 13-223

- list telephone numbers, 13-215

- list traffic telephone number, 13-215

- new extension accumulating summary data, 13-216

- new extension subject to CMR, 13-219

- revise CMR traffic internal time, 13-199

- revise cost printout adjustment factor, 13-218

- revise department name, 13-213

- revise department number, 13-213

- revise departments subject to exceptional call recording, 13-227

- revise division name, 13-212

- revise exceptional call parameters, 13-225

- revise extension accumulating summary data, 13-216

- revise flat rate table, 13-211

- revise international rate, 13-211

- revise NNX table count, 13-206

- revise NNX table, 13-205

- revise NPA table, 13-207

- revise rate group count, 13-209

- revise rate group table, 13-208

- revise traffic telephone number, 13-216

- set CDR block count, 13-228

- set future print time, 13-217

- set system for area code CMR, 13-228

- start CMR traffic statistics report, 13-197

CDH Trunk Bypass. See also Bypass.
